Full Stack Developer

DigitalSalt Technologies 11/2024 - Present Ghatkoper , Mumbai
Work On client side with NSE cogencies
• working on Stock Related Project

E-Innosec consulting

E-Innosec consulting 04/2024 - 11/2024 Thane west, Mumbai
Company Description
• Led the development of the front-end for a GRC auditing software using Next.js and Redux
• Integrated with the backend framework for privacy policy management, including web scraping to analyze privacy policies and implementing cookie banners for compliance
• Developed a script generator to embed privacy and cookie consent features into other projects
• Enabled users to make data requests, track requests, and assign them to designated resolvers
• Built the Risk Assessment module, which calculates risk based on four assessment types: asset-based, asset with exposure, process-based, and process-based with exposure
• Implemented functionality to add, remove, and search for threats, vulnerabilities, processes, and controls
• Developed the People Management module, handling onboarding and offboarding details, employee training, and company-wide policies and procedures
• Managed course and training data for employees, and integrated policy updates seamlessly

Software Developer

ValueX Digital 03/2023 - 03/2024 Bhopal, MP
Company Description
• Developed a full-scale real estate platform from scratch, utilizing Next.js for the front-end and Node.js, Express.js, and MongoDB for the back-end
• Implemented complete functionality including property listings, user management, and integrated an admin panel for seamless content control
• Check out the live project: propertytradefair.com
• Developed full-stack e-commerce platforms for industries including travel, photography, and printing, utilizing React, Redux, Node.js, and MongoDB
• Implemented responsive UIs with HTML, CSS, and Bootstrap for a seamless user experience
• Engineered a secure financial record management system for SBI, with an encrypted data architecture
• Built with React (front-end), Node.js (back-end), and MongoDB for robust, secure storage, while integrating Redux for efficient state management
• Delivered diverse React-based applications, including NGO websites and retail platforms in the beverage industry
• Improved performance and SEO by incorporating Next.js
• Integrated WordPress CMS for seamless content management on specific projects
